TECHNICAL

SKILLS Languages: PYTHON, JAVASCRIPT

Frameworks:

Django (DJANGO REST FRAMEWORK),

JavaScript (React)

Technologies:

CSS (Tailwind CSS)

HTML

Other: AWS S3, POSTGRESQL, GIT, Problem Solving

ACHIEVEMENTS

● Backend Development Certification, HNGX, 2023

Dear Sir/Ma,

SUMMARY

I'm a solution-driven backend developer with a strong skill set in programming languages like HTML, CSS, JavaScript, and Python, complemented by a deep understanding of web development frameworks such as React, Tailwind CSS, Django, and Django Rest Framework

EXPERIENCE

HNG - Web Developer   09/2023 - 10/2023

● Built the authentication system and other features on the backend and built the authentication pages on the frontend.

● Developed and maintained responsive web applications.

● Collaborated with other developers, designers, and project managers to deliver high-quality projects.

PERSONAL PROJECTS

● **Mean App**: This Project employs a combination of AWS S3, React and Tailwind CSS to provide functionalities such as image compression, file format conversion and file resizing. GitHub Repo – LINK

●**Economic**: This Django project is a simple market application for managing products, categories, user accounts, and orders. GitHub Repo - LINK

● **Video Recording**: This project is a Django-based application that allows you to upload video chunks, combine them into complete videos, and retrieve the complete videos. It can be used to handle large video uploads by breaking them into smaller chunks GitHub Repo - LINK

Sincerely,

Okanlawon Abolaji Olatunde
